

PMUSA Clinical Evaluation Process:
Referencing PMUSA clinical studies

Date: 17 February, 2004

To avoid confusion and errors, **all** communications (written, electronic, or verbal) within PMUSA or between PMUSA and entities external to PMUSA regarding a PMUSA clinical study **MUST** reference the PMUSA CE-assigned tracking number for the clinical study in the subject line.

An external entity may **also** include their own internal tracking number for the study, but the PMUSA CE-assigned number is the official tracking number of record.
